

THE **SOWIS** SYSTEM

Stand Off Warning Identification Software

By simply panning across a crowd with the SOWIS camera, dangerous substances can be identified quickly, non-invasively, and at standoff distances.

Features

- Chemical detection: ANFO, smokeless powder, TNT, TATP, and other common explosives, at distances of up to 300 feet away.
- 3D Facial
- Infrared: Structural anomalies
- Uniform/vehicle authentication detection

Applications

- Civilian security: airports, immigration ports, public malls
- Transportation: shipping, trucking
- Buildings: high value infrastructure for government offices
- Events: public gatherings
